👤 [in/eddm8](https://in.eddm8)

Experienced software engineer and engineering leader. I enjoy using Ruby, Rails, web, and mobile technologies. I love working with teams that are committed to continuous improvement and customer-centricity. I believe in [servant leadership](#); [empowered product teams](#); [outcomes-over-output](#); [continuous delivery](#); [running less software](#); [the Pareto principle](#); [optimising for programmer happiness](#); [party parrots](#); [boring technology](#); [outsourcing undifferentiated heavy lifting](#); and surgically focussing innovation where it matters.

Experience

2021-Now

Stripe

Software Engineer

I work at Stripe in the Banking-as-a-Service team, helping to grow the GDP of the Internet by enabling businesses to embed financial services into their products: like issuing payment cards, and treasury.

2007-2010
2011-2021

BiggerPockets, LLC

Various roles, from Software Engineer to Senior Director of Engineering

I joined [BiggerPockets](#) as a contractor in 2007 during the company's infancy. I have helped it grow from newcomer to a leader in its market; from hundreds of users to millions, and from a team of two to over fifty people. My contributions to the growth of BiggerPockets have ranged from individual technical contributions to senior leadership capacities.

2010-2011

Microsoft

Software Developer

I joined Microsoft UK as a summer intern between the last two years of college to work as a developer in the Public Sector Healthcare team. I remained at Microsoft through the final year of my degree to work on the UK launch of their [HealthVault](#) product.

Education

BSc (Honors), Computing
Bournemouth University, 2007-2011

Things I Like

Video games, basketball, music, 日本語を学べいる, books, the oxford comma, and collecting sneakers.
